No little miss prebension exists as to the amount of gold annually exported from New Zealand. This chiefly arises from the fact that igned of the New Zealand gold reaches this country by way of Methourne and Sydney, hence it goes to await the total received from Australia. The custom house authorities here have no means of making separate returns, so that New Zealand is deprived of her fair share of fame. The government of New Zealand has supplied the following returns, clearly showing the immense wealth of the gold fields in these islands:—

having in the short space of aim years increased that yield more than forty-field.

During the quarter ending September 30, 1860, the total yield of the god fields was 181, 405 ounces, valued at £701,835, but of this large amount only 1,875 ounces were shipped direct to Endand, thus confirming what we have aircade stated as to Australia reaping the credit due to New Z-sland.

OUR MONTREAL CORRESPONDENCE.

MONTREAL, C. E., Feb. 14, 1807.

OTIANA CANALA.

A point of some importance to your readers interested in the Canadian lumber carrying trade is that the government has decided not to enlarge the locks or deepen the Grenville Canal. This is a very necessary work, as at present a vessel drawing over four feet air inches cannot pass. The government was pledged to the work, the leading forwarders had leaned money, when the Commissioner consistently broke his promise, nothing new in him, or any of them, I assure you. The prospect of additional high duties on the lumber trade makes sellers reticent, and prices rule high—\$16 a \$15, gold, per thousand feet, board measure.

A MEN RARATORS,

minus the tiger, is being built at Cale-some Springs, on the Ottawa. A grand hotel and railway are in process of construction. In former days invalide and others came here from all parts of the States, in which the waters were of great renown. The race track, however, whereon my friend Ten Broeck parades his mighty horses, is overgrown wish thisties, and "Ichabod" is inscribed on the ginger beer saloon. However, the new arrangements are on such a scale that I hope during the next session to find the place crowded a of yore with pretice girls, making delectably my faces over the infusion of water and boiled warming pans, and dry, yeliow men, in linen dusters, who stick to the salubrious Bourben and inocuous "forty rod" like legislators.
